

ARCHITECTURAL CLASSICS®

manufactured by The Foundry®

Shake and Scallop siding adds traditional elegance.

Alside

Traditional elegance

Innovation forged from tradition.

It is about respect. A respect for the natural beauty of cedar. The way its grain and the marks of a mill saw interact with sunlight. How those random patterns give a home its own unique character. How techniques and knowledge hundreds of years old can still bring forth innovations, like an exterior siding never seen before.

Natural beauty that endures.

Let us be the first to agree with you, wood siding is beautiful on a home. But it's a beauty that quickly succumbs to the elements. Cracking, fading, buckling, rotting. It is a look that is expensive and time consuming to maintain.

Alside offers a family of exterior siding that eliminates the need to compromise aesthetics for practicality. Architectural Shingles, Shakes, Staggered Shakes, and Scallops will endow your home with all the timeless beauty of wood rendered in a manmade material that is maintenance free and easy to install.

Craftsmanship and technology.

We love the look of wood. It is the inspiration for this completely proprietary process. With nearly 100 unique molds, taken from actual cedar shake and shingles, each home is individually beautiful.

No other manufacturer is as committed to rendering the natural, random beauty of cedar as Alside.

Energy efficiency.

Give your home the environmental and financial benefits of improved energy efficiency with the Fullback® Thermal Support. When used with Architectural Classics, Fullback provides a complete wall system that dramatically improves thermal efficiency, rigidity and durability. Help reduce your energy costs by up to 20% by choosing this patented insulation option. The Fullback Thermal Support System can be installed with all 7" exposure panels from Architectural Classics including Premium Shake, Shingle and Staggered Shake Profiles.

Traditional, right down to the way it's installed.

The contractor and installer will feel an immediate connection with Alside Architectural Classics, because it is installed in a traditional fashion. Architectural Classics features a traditional, full-length nail hem. In addition, because of the 5' single panel design, it is easier to handle on the wall, saving labor and material on each project (5" Shingle is a double-course panel).

Invest now. Save later.

You can enjoy the true look of cedar, with none of the headaches, for a fraction of the cost.

With Architectural Shingles, Shakes, Staggered Shakes and Scallops you can count on years of not having the expense of scraping, sanding, staining and painting. Each panel is carefully manufactured with a unique finish that improves fade resistance and weatherability. The Architectural Shakes line now offers an exciting variety of rich and unique colors that are made possible through the Acrylic finish process. If how you spend your time and money are important to you, then Alside's Architectural Classics can offer you the natural beauty of cedar and much, much more.

Authentic

It could very well be that you've seen a house with Alside siding and assumed it was natural wood. It's that realistic. You see a defined texture of natural grain that lends an organic randomness while creating a natural shadowing effect so that no two houses are the same.

Easy To Install

Architectural Shingles, Shakes, and Staggered Shakes go up fast and easy, just like traditional siding. Each 5' panel requires just a single installer and our use of a familiar full-length nail hem means no specialized training or tools are needed to install Alside siding.

Scrap Reduction

Alside products will yield an environmentally and financially responsible 67% less scrap. Because of our random design and hidden seams, small pieces are easy to use, helping to ensure that no two homes will ever look the same.

Performance

Architectural Shingles, Shakes, Staggered Shakes and Scallops resist buckling and open laps and can be installed any time of the year. Plus, Alside products are backed by a lifetime limited warranty*.

ARCHITECTURAL
SHAKES™

A Faithful Reproduction of Cedar's Natural Grain.

Our Shakes bear the rich gran of hand-split cedar. Our Shingles, the random marks of a mill saw. And on all our claddings, the texture is carried through on the bottom edge of each shingle – an honest rough-sawn look. This level of authenticity is only possible with our proprietary process.

What you won't see are seams. Even when you know just where to look, they're difficult to find. All this makes Alside's Architectural Classics the most realistic siding anywhere.

ARCHITECTURAL STAGGERED SHAKES™

The past meets the present.

Architectural Staggered Shakes echo the rustic charm of another time. Their uneven pattern and the rough-sawn look of their edges make them appear handcrafted. And they are. But not by a carpenter in a musty barn, but by our artisan mold makers.

Handcrafted authenticity.

Shakes have always been esteemed by those who believe a home should be one with its natural setting. Split along the grain, cedar Shakes are deeply textured in a way that sets off an interplay of light and shadow. The sun moves across the sky, and the light changes the house, as it does the landscape. Architectural Shakes are the only other way to capture this beauty.

Naturally Aged

Architectural Classics Premium Colors captures the essence of time, giving a home the authentic appearance of cedar that has naturally weathered over the years. Our proprietary process achieves this incredible look by presenting a darker shade of a color in the grain, and a lighter one on the higher points. Premium Colors are available in 7" Split Shake, 7" Perfection Shingle, and 7" and 10" Staggered Shake.

ARCHITECTURAL SHINGLES™

Our modern take on this classic never has to be painted or stained to maintain resilience to the weather. Plus, unlike organic wood, Architectural Shingles will never warp or split.

5" Shingle

7" Shingle

7" Perfection Shingle

Classic style without the upkeep.

Originally referred to as the “seaside style”, cedar shingled homes first lined the cobblestone streets of Boston in the 1800’s. Like the original, only Architectural Shingles have a naturally textured surface and edge. You can even see the random marks of a mill saw.

The new Perfection Shingle delivers the perfect balance of the deep texture of Shakes and the clean lines of Shingles. This profile offers a traditional look with a hint of ruggedness. Offered in a 7" exposure, the crisp vertical grains are highlighted, complementing random shingle widths.

The Beauty of Custom Craftsmanship.

ARCHITECTURAL
SCALLOPS™

Scallops that mix and match for distinction and style.

Even if you don't own a Victorian or a Queen Anne, Architectural Scallops afford you the opportunity to bring style and originality to your home. Challenge your imagination with the possibilities. They come in a broad palette of colors, many of which simply are not available anywhere else.

For drama or distinction, nothing matches the versatility or creative possibilities of Architectural Scallops.

Architectural Shakes can be used as either an accent or as conventional siding on your entire home. Use Alside standard or Trimworks corner posts or choose these special shake corners designed to match each profile for a truly finished appearance.

Available Colors

NOTE: Colors are as accurate as printing techniques allow. Make final color selections using actual vinyl samples.
